COUNCIL, SCHOOL BOARD MEET ON SITE; DECISION DEFERRED

A special meeting was held on Thursday, Feb. 24, between the Prince Georges County Board of Education and the Greenbelt City Council. The meeting was intended to review the various offers the city and Greenbelt Homes, Inc. have made in an effort to persuade the school board to choose the city-preferred Beltway-Lake site over parcel 2 for a senior high school. A final decision by the school board was deferred to a later date.

A full exchange of views took place with the school board listening politely to the city's case and commending the council for its valiant fight.

Much of the discussion concerned the comparison of costs between the two sites. According to the school board, land acquisition costs would be some \$370,000 greater for the Beltway-Lake site than for the parcel 2 site (see accompanying box for explanation of figures). In addition, the school board estimated that earth removal at the Beltway-Lake site would cost some \$30,000 more than at parcel 2 and that additional site development items such as roadways would cost another \$25,000.

Offsetting these two items, however, would be the cost of a special pumping (lift) station for sewage that would be needed for parcel 2. This item is estimated at up to \$55,000, but it is uncertain what proportion of this cost would be borne by the school board.

School Board Revises Figures

These estimates represent a great reduction from the first estimates presented by school engineer Elliot Robertson at the Greenbelt public meeting of February 8. At that time he said that earth removal cost differences would amount to \$106,000 and that overall site development costs would be \$84,000 greater on the Beltway-Lake site.

At last Thursday's meeting, the city council presented its own estimates of earth removal costs worked up in cooperation with the engineering firm of Greenhorne and O'Mara. The city informed the school board that it had nearby city-owned land available for fill dirt. After reviewing the figures, the school board conceded that the overall site development costs for the two sites might turn out to be roughly equal if one assumed that the school board would have to pay \$55,000 for a pump station. No discussion was held on what fur-

ther savings might be gained if the school design for the Beltway-Lake site were changed.

The city council pointed out that the board's figures did not include the extra costs to the city that would arise from a senior high school on parcel 2, such as the estimated \$175,000 needed for widening of Ridge Road, Northway, and Southway. These costs, the city argued, should be included in the estimates since they are part of the total cost borne by the taxpayer whether through county or city taxes.

The city council was told, however, that the question of off-site roads, traffic hazards, and sidewalks is a city responsibility, and not the board's.

The school board acknowledged that it did not have a binding contract with the owner of the property — Consolidated Syndicates, Inc. — to purchase the 58 acres. A somewhat different impression had been left at the February 8 public meeting.

Local Man Honored

Hugh Jascourt of 7 Maplewood Court has been selected as Outstanding Physical Fitness Leader in the State of Maryland for 1966, and will enter the national competition. The accomplishments in the field of physical fitness, which earned Mr. Jascourt this award, include:

- (1) Founder of the Road Runners of America and four times president of that organization.
 - (2) Participation in founding Women's Road Runners Club.
 - (3) Proposer of present Maryland Jaycee "Run for Your Life" program; serves as State Chairman of this project.
 - (4) Sports chairman for local Greenbelt Jaycees; Mr. Jascourt helped organize and promote the community "Jog Along" program.
- His friends wish him luck in the national competition.

WHAT GOES ON

Saturday, March 5, 10 am - 1 pm
Little League Registration,
Youth Center

Monday, March 7, 8 pm Peace
in Vietnam Meeting, Co-op

Meeting - Youth Center

Thursday, March 10, 7-9 pm
Study Hall, Methodist Church
8 pm Irish Night, Social Hall,
Community Church

Post Office Request

The local Post Office asks the help of residents of Greenbelt in two problem areas: 1. Dog Bites, and 2. Numbers on houses, and names on apartment mail boxes.

A number of local mail carriers have been bitten recently by dogs. In order to insure the safety of the carriers, delivery may be terminated to the house involved and all the houses in the same court if necessary. Please keep your dog tied away from the door or in the house when mail deliveries are being made.

It is much easier to deliver mail and deliveries are much more accurate if names are placed on apartment boxes and numbers placed on houses. This will insure you better service.

The Post Office is ready and willing to cooperate in all areas of mail deliveries. Postmaster Emory A. Harman mentioned today, and if you have any problems, the Post Office will try to alleviate same.

AGENDA

REGULAR MEETING OF CITY COUNCIL

Monday, March 7, 1966

I ORGANIZATION

- 1 Call to order
- 2 Roll call
- 3 Minutes of Regular Meeting February 21, 1966 and Special Meeting March 1, 1966
- 4 Additions to Agenda by Councilmen and Manager

II COMMUNICATIONS

- 5 Petitions and Requests
- 6 Administrative Reports
- 7 Committee Reports

III OLD BUSINESS

- 8 School Sites
- 9 Reclassification of Employees
- 10 Appointments to Committees
- 11 Request for Fence on Pathway Right-of-Way

IV. NEW BUSINESS

- 12 Ordinance to Amend Ordinance No. 592, In Order to Establish Service Charges for Delinquent Refuse Collection Accounts (1st reading)
- 13 Ordinance to Repeal Ordinance No. 405, an Ordinance Regulating Parking in the Service Courts in Greenbelt, Maryland (1st reading)
- 14 Approval of Bills - Special Public Building Construction Fund
- 15 Road System - Springhill Lake

New School Proposal Reviewed at Meeting

A new element was thrown into the complicated senior high school "crisis" at a hastily-convened informal city council meeting on Tuesday, March 1.

Council reported to representatives of Greenbelt Homes, Inc., Citizens for a Planned Greenbelt and other citizens that discussions are being held with the developer Charles Bresler in an attempt to see what other avenues are open for settlement of the matter. Bresler represents the owners of the two vacant sites (Beltway-Lake and Parcel 2) that are being promoted for a senior high school.

As a result of these opening negotiations, the County Board of Education has agreed to defer its final choice for 15 days.

FEDERAL BUDGET ITEMS MAY AFFECT GREENBELT

The federal budget sent to Congress earlier this year contained several items affecting the Greenbelt area. One of these, sure to meet the approval of commuters, is an allocation of \$671,000 to improve entrance and exit ramps on the Baltimore - Washington Parkway. This is largely the result of efforts by Md. Senator Daniel Brewster who pointed out the rising accident rate on this highway.

New facilities at Beltsville were also included in the budget. The Secret Service will receive a \$1,200,000 facility, while \$950,000 was earmarked for planning a \$16.8 million laboratory for the Food and Drug Administration. On the other hand, in spite of protests by local congressman Hervey Machen, it has been decided to locate the new patent office, for which a Beltsville site had been previously considered, in another area.

Spending for parks in Maryland includes \$3.4 million for beginning the acquisition of land for the Assateague National Seashore, \$525,000 for an amphitheatre at Fort Washington in southern Prince Georges County and \$179,000 for trails and roads along the C&O canal.

GHI Reaffirms Land Offer

by Rita Fisher

The choice of sites faced by the County School Board in planning the construction of a tri-school complex here was the main point of interest and discussion at Feb. 24's meeting of the Board of Directors of Greenbelt Homes, Inc.

As reported to the Board by city Councilman Bill Hoff, the School Board was expected to make its decision last Thursday. For some reason, the decision was postponed until Monday, Feb. 28, at which date the offer by developer Charles Bresler to sell the land to the County was due to expire.

The Board moved to send a wire to the School Board before Monday's meeting, reaffirming the Board's offer of the land for the elementary school site and noting that a special meeting of the GHI membership on the matter could be called on ten to 20 days notice. It also pointed out that 70% of the signatures on a recently circulated petition for relocating the school were those of GHI members.

Miscellaneous

Acting on the recommendations of the Member Relations Committee reported by its chairman Betty Allen, the Board decided to eliminate the holiday Open House, substituting in its place a Spring Open House, the program of which is to be decided at a later date. The board also moved to renew the practice of serving coffee at annual meetings and to have the committee send a welcoming letter and a Greenbelt telephone directory to new GHI members. Furthermore, GHI plans to set up an audio-visual presentation to be displayed during weekends for the enlightenment of prospective new members.

Peace in Vietnam Meeting

The Greenbelt Committee For Peace in Vietnam will meet Monday, March 7, at 8 p.m. in the Hospitality Room of the Co-op Supermarket. Everyone who is interested

in discussing the information provided by the Women's Strike For Peace leaflets recently distributed by the Greenbelt Committee is urged to attend.

Audience Response

Objections to the proposal from the audience were overwhelming. The major objection concerned the R-30 zoning for parcels 1 and 2. The Greenbelt Master Plan calls for 55 acres of these parcels to be zoned for single-family homes and 63 acres for R-30 apartments with the rest reserved for parkland or park use. The Master Plan stresses low density for this area because of the traffic problems that will be created along Ridge Road and Northway.

Many speakers, including Al Herling, Nat Shinderman, and Harvey Geller, stressed the fear that accession to R-30 zoning will jeopardize the whole Greenbelt Master Plan. Shinderman said that it will be difficult to defend our Master Plan in court appeals and before the District Council if we agree to its violation ourselves. Herling added that R-30 will open up a Pandora's box.

Other objections concerned the insistence that the city and GHI stick by its offers of land. The whole purpose of these offers was to make certain that parcels 1 and 2 would be developed in a manner compatible with the Master Plan.

GHI president Charles Schwan saw no advantage to the city or GHI in now making its land available for an elementary school site. All this would do, Schwan said, is to give Bresler 10 additional acres to develop at high-density.

Price Too High

Likewise, the council agreed that the price of the proposal as it now stands was too high. Some citizens questioned whether a senior high school in the core of Greenbelt was a necessity.

Hal Siegel suggested that council make a counter-offer to the school board. He noted that on October 12, 1965, the school board passed resolution 546 which expressed its willingness to acquire the Beltway-Lake site at a price not to exceed \$18,000 an acre. He suggested that the city offer to pay the difference between the \$18,000 figure and the fair market value as established by condemnation proceedings. Such proceedings are scheduled for April 7 and 13. He pointed out that the cost to the city would probably be no more than the cost of widening Northway and Ridge Rd.

George Neumann suggested that if the 3-school complex goes on parcel 2, the Greenbelt Master Plan should be revised to lower the density of parcels 1 and 2, to offset school traffic.

\$370,000 or \$165,000?

The Prince Georges County Board of Education has come up with a \$370,000 figure as the additional land acquisition cost incurred by the school board if it chooses the Beltway-Lake site over the parcel 2 site. The \$370,000 figure was obtained as follows:

The Beltway-Lake site would cost \$25,000 per acre for 30 acres or \$750,000, which reduces to \$625,000 after subtracting the 5 acres the city would purchase. To this must be added the cost of the elementary school and junior high school which would be located in the north end of town. Greenbelt Homes, Inc. would make available a 10-acre elementary school site at a price of \$2,500 per acre, amounting to \$25,000. The city would donate 5 acres of the city landfill for a 15-acre junior high school, leaving still 10 acres that the school board would need. The school board assumes that these 10 acres would cost \$160,000 or \$16,000 per acre on the basis that near-by land on Ridge road near Boxwood Village recently sold for this amount. This makes the total acquisition cost of the Beltway-Lake site: \$625,000 + \$25,000 + \$160,000 or a total of \$810,000.

The \$810,000 figure is then compared with what 55 acres on parcel 2 for all three schools would cost. The owner of that parcel — Consolidated Syndicates — has offered the land at an average price of \$8,000 per acre or a total of \$440,000. Subtracting the \$440,000 from the \$810,000 leaves a difference of \$370,000.

City, GHI, and CFPG officials dispute these figures. For example, the \$25,000 per acre value attached to the Beltway-Lake site is questionable since condemnation hearings have not yet been held. Similar land in that area has been appraised at \$20,000 per acre. If the \$20,000 figure is used, the land acquisition costs for the Beltway-Lake site are reduced \$125,000. In addition, officials dispute the \$16,000 per acre price tag for the junior high site, since that land has no sewage facilities while the land near Boxwood Village which was used as a guide is fully sewered. Generally speaking, land without sewage is worth half of that with sewage. Hence it is figured that a more correct value to attribute to the 10 acres for a junior high school would be \$80,000, rather than \$160,000. Thus, subtracting from the \$370,000 difference, the total of \$125,000 and \$80,000 reduces the differential between the two sites to \$165,000.

"Votomatic" Machine

Chris J. Wienecke, chairman of Prince George's Election Board, demonstrated IBM's new "Votomatic" device at the February 23 meeting of the Greenbelt Democratic Club. He was preceded by W. Waverly Webb, Clerk of the Circuit Court, who swore in the Club's officers elected last November.

The votomatic, invented by Professor Harris of the University of Southern California, is a device which uses a special type of IBM card for a ballot. The voter inserts his card behind a perforated board, marks his choices by pressing a stylus into some of the board's holes and the result is a punched card, similar to those used by most computers, in which all his choices are encoded. The holes in the ballot are punched row by row; a small "book" is mounted atop the device and each time a page is turned in it, a fresh line of holes is uncovered, with pertinent instructions printed on the uncovered page.

Devices of this sort cannot yet be legally used in state and county elections, though a bill is now being introduced by Prince George's delegation to permit their use in this county. Their main advantage is, of course, speedy tallying of the vote by computer; other virtues which helped them win the enthusiastic support of the election board are low cost (\$185) and weight (46 lbs.). The old-style voting machine - of which the county has 309 - costs \$1624 and weighs a hefty 745 pounds. Its capacity is rated at twice that of the votomatic, but Wienecke claimed that many voters actually make up their minds faster using the latter because of its compact and convenient display of instructions.

The votomatic is less lenient to careless voters, however: whereas in cases in which (say) 5 names have to be selected, the standard machine automatically prevents a 6th lever from being pulled, an unobservant user of the votomatic is not hindered from punching more than 5 holes. The tallying computer then invalidates his vote on that particular issue. Once a mistake is noticed, of course, it may always be rectified by obtaining a fresh ballot.

Can Be Used Here

While the votomatic may not yet be used in a general election, it is available to municipalities and to such organizations as GHI (which has in the past rejected the use of voting machines because of the cost involved). It was used for a city referendum in Carrollton in January and was favorably received by most users. Typical comments were: "Very simple - I like it," "Simple, quick, easier to follow" and "Easy to operate and to read." In that election 507 votes were cast and their tally by computer took a mere 90 seconds.

Wienecke also used the occasion to announce a registration drive, sponsored by the League of Women Voters and set for Saturday, March 26, with other county-wide registration days scheduled for May 14 and August 9, the last date preceding election day on which registration is held (incidentally, he also noted that the last day for voters to switch their party affiliation before election day is July 5). Wienecke also announced that in order to facilitate registration by working persons a registrar is now available in the County Service Building in Hyattsville every Tuesday and Friday evening between 6 and 9 p.m.

Woman's Club Shamrock Night

"Ireland in Poem, Song and Story" with Mrs. Mary D. Henry as Chairman, will be the program at the March 10 membership meeting to be held at 8 p.m. in the Social Hall of the Community Church.

The Madrigal Singers of Regina High School, Hyattsville, Md. will sing songs in ancient Gaelic as well as Irish folk-songs. This group is conducted by Mother Marie Laetitia, R.J.M., who directed the Choral Group recording "Patterns in Song," "Jesu Bambino," "Life of Love" and several others.

A group of Regina High School girls will do Irish step-dancing and the "Prince Georgemen" of Greenbelt will highlight old Irish folk-songs.

Featured among the displays in the Hall will be an heirloom wedding veil of Irish lace bearing a symbolic pattern, the only veil of its kind in this country.

Also appearing on the program will be Mr. Ronald Gorton, a member of the Maryland Speech and Drama Ass'n. Mrs. Mary Henry will give the Legend of the Shamrock in Gaelic along with a running translation. Mrs. Robert Hill will be in charge of refreshments. Members of the Club are urged to invite their husbands and friends to this gala affair of jigs, reels and hornpipes.

The monthly Board meeting will be held at the home of Mrs. Frank Lewis on March 3 at 8 p.m.

Lastner Commended By Metro Council

County Commissioner Frank J. Lastner, 19-P Ridge, presently recovering from an illness in Prince George's General Hospital, received commendation and best wishes this week from the Metropolitan Washington Council of Governments - which he helped to establish some years ago. The council said, among other things:

"BE IT RESOLVED, that the Board of Directors of the Metropolitan Washington Council of Governments expresses to Frank J. Lastner its sincere wishes for a swift and complete recovery and an early return to his positions of public trust and responsibility."

GCS Area Delegation Holds Nominations

Six seats are up for election on the area delegation to the Greenbelt Consumer Services Congress. Nominees must be GCS members. Positions are for 2 year terms. Nomination forms are available at the GCS store information booth. Completed forms, including a biographical sketch, must be received by GCS Secretary Don Cooper no later than March 28.

Elections Chairman Carnie Harper asks that GCS members volunteer to serve on her committee.

Plans are underway for the annual area membership dinner and meeting now scheduled for May 9. Volunteers are needed to work on dinner arrangements according to Mat Amberg, delegation chairman.

BUSY CUB SCOUTS

Cub Scout Pack 202 really had a full month in February. Their Blue and Gold Banquet was very successful with over 200 people attending. Michael Speelman read a letter from the Architect of the Capitol, giving a flag which had been flown over the United States Capitol. All dens had a skit. Everybody seemed to enjoy themselves.

Greenbelt Grab-bag . . . by Punchin' Judy

Around our house we have the pitter of little feet. No, silly, not the children's. They don't pitter, they stomp. What we mean is the four-footed variety. We share our home with two, one of the feline persuasion and one of the canine.

Now, it as a matter of common knowledge that these two species cordially abhor each other. Our two have proved no exception. Never does the cat pass the dog without lifting a lip in a hissing sneer. Seldom does the cat finish a meal without the accompaniment of a ferocious snarl from the dog. This has been going on for years. We've had the cat longer than we've had the children, and he could never see the point of our having children, never mind acquiring a dog. Yes, the cat has squatter's rights, but on the other hand the dog is bigger, so you can see that it leads to an impasse.

As we've said, we've been living with this cold war for years, sometimes watching it erupt into a full scale battle. And for years we've wondered why nobody ever seemed to get hurt in the process. But now we think we have figured out the answer.

The other night we fed the animals, patted them on the head, put on our coat, and left the house. Moments later we realized we had forgotten something, and returned. A fantastic sight greeted our popping eyes! Cat and dog were sitting muzzle to muzzle, obviously deeply involved in communicating. But communicating what? Maybe we've been watching too many spy stories on TV, but this is how we interpret the situation.

"Er, Agent 45, have you memorized the secret formula?"

"Yes, 44, I memorized it and then swallowed it."

"Good work. I got a message from Control. Plan A has been changed to Plan C."

"That's dangerous. You realize

Our Neighbors

Elaine Skolnik - 474-9060
It's a girl for Mr. and Mrs. S. Morydas, 11-S Ridge. A nita Stephanie made her debut Feb. 25 weighing 5 lbs. 6 oz. She joins a brother, George. Anita's mommy, Virginia, is a staff member of the News Review.

Mr. and Mrs. Jeffrey Stevens, 32-F Crescent, proudly announce the birth of a son. Michael arrived February 23 weighing 7 lbs. 7 oz.

Ted Henry of the USS Constellation is home on leave. His mother, Mrs. Henry, 9-D Ridge is delighted that the whole family will be together at the special Woman's Club program, "Ireland in Poem, Song and Story" on March 10. Here for the occasion will be daughters, Mrs. Maura Bryan and Mrs. Paul Del Vecchio and of course son Alan, who is a member of the Prince Georgemen.

Congratulations to the High Point basketball team who are now the Prince Georges County champs. The Eagles will compete in the state class AA tournament at the University of Maryland's Cole Field House on March 10. We wish them the best of luck. Chuck Figlia, George Moraz, Dave Driscoll, Rick Mest and Steve Cox are the team's five starters. Greenbelt students attending DuVal are mighty proud of their team for the assist they gave High Point in beating Oxon Hill and Northwestern.

Note the following new addresses: Earl C. Doss, 13-L Ridge; Orris C. Sisk, 36-Q Ridge; Aubrey Wiener, 6-N Ridge.

Proud grandparents Mr. and Mrs. Malcolm Durfee, 13-K Hillside, and Mr. and Mrs. Raymond Stevens, 101 Birch Court, Boxwood, announce the arrival of a grandson, Michael Stevens, who was born Feb. 23, weighing 7 lbs., 7 oz. Proud parents are Mr. and Mrs. Jeffrey Stevens, 32-F Crescent.

Mr. and Mrs. Malcolm Durfee announce the birth of another grandson on Feb. 24. Weighing 7 lbs., 5 oz., Charles Edward Rice, Jr. is the son of Mr. and Mrs. Charles Edward Rice, 13-K Hillside. Paternal grandparents are Mr. and Mrs. Eugene Rice of Mt. Airy, Md.

that you'll be the one to take the risk."

"And loving it! But we'd better be careful. I think the HOG are getting wise."

"What is HOG? A secret enemy organization?"

"Humans of Greenbelt. They're clever but we can outwit them."

"Agent 44, you're so brave."

"Merely doing my job. But I wish you'd watch yourself. You nearly bit me yesterday."

"Well, you almost scratched my eyes out."

"Sorry about that. I got sort of excited chasing that bull dog."

"That what?"

"Er, that spaniel? Daachshund? Would believe a pekinese?"

"Never mind that. I think your tail is ringing."

OK. OK. Maybe that's not exactly what they were saying, but something funny is going on. When we surprised our pets in their cozy tete-a-tete, they instantly began to growl and spit at one another. That was to lead us off the track, of course. But like they admitted, the HOG are smart, too. Just don't say we didn't warn you.

Attention: Senior Citizens

On Wednesday, March 9, 1:30 p.m. at the Greenbelt Youth Center, all senior citizens are invited to hear a talk on Social Security benefits and Medicare.

At this time, you may have any questions answered as to the benefits, eligibility, how and where to sign up for these benefits.

The deadline is March 31; Social Security is trying to reach everyone before that time. Everyone is welcome.

Science and Success Meet at Greenbelt's Science Fair

On February 18, Greenbelt Junior High School displayed 405 projects at its 15th Annual Science Fair. According to THE BEAR NEWS, the Greenbelt Junior High newspaper, over 2,700 people attended this event.

Cheryl Samson, Mike Ellerlin, and Gary Thorne captured 1st, 2nd, and 3rd grand awards respectively. Miss Samson, the top grand award winner, achieved the honor in the category of botany. For the second highest honor, Mike Ellerlin displayed his talent in medical science with the effects of color on memory. With an aquarium of tropical fish, Gary Thorne received the third highest award for his effort in the cross-breeding of fish.

According to fair officials, this fair was the best science event ever held at the local junior high. Dr. Howard Owens, Prince George's County Science Supervisor, stated that the fair was the largest held in the county this year.

The following statements were made by the grand award and first place winners:

First Grand Award Winner (Botany)

Cheryl Samson - Boxwood Village
My project was concerned with the respiration rate of fruits and vegetables. In my exhibit, which I called "How to Strangle a Pear," I proved that fruits and vegetables require sufficient oxygen in order to carry on one of life's basic processes.

I chose this topic because of my curiosity about the amount of oxygen given off by the plants in the science room at Greenbelt Junior High School. However, I decided to narrow my project down to fruits and vegetables because I did not want to concern myself with photosynthesis.

To prove that the rate of respiration increased with an increase of fruit size and a rise in temperature, I put the fruit and potassium hydroxide in jars. The jars were left in a hot or cold room for 24 hours. My next step involved a process called titration, which is the means of measuring the amount of carbon dioxide collected by the potassium hydroxide. Then I graphed my results on charts.

My hypothesis proved correct in that the respiration rate increased with the size of my fruits and vegetables and a rise in temperature.

Second Grand Award Winner (Medical Science)

Michael Ellerlin - Lakeside Drive
The title of my project is "Your Colorful Memory." I chose to experiment with memory because I hope one day to become a psychologist. Two questions were raised in my mind that I wanted to deal with: Which is more frequently remembered, words or drawings; and does color affect the memory? For the purpose of testing I

made two posters with 15 words and 15 drawings on it. One was in the three primary colors and the other in black. Then I tested 290 junior high students.

An example of the results can be seen when 49 subjects remembered a shoe in black and white while remembering it 113 times when it was in color. The word "ball" was remembered 33 times in black but 69 in color.

The conclusions I drew were the following; that color affects the memory over black with a substantial margin and drawings are remembered more than words by about 550 times. These results can be applied to advertising, text books, and teaching.

Third Grand Award Winner (Zoology)

My project, called "I Spy," began as a careful study of the characteristics produced in the cross-breeding of several species of fish in the same family.

After observing carefully the fry (young) of these breedings, I found them to be all female. Since this breaks laws of heredity, I decided that there must be some scientific reason.

Research on the subject showed that in the Mollenesia family, the two species Sphenops and Latipinna, when crossbred, produced all female fry.

I found through this research that the fish I bred were variations of the species mentioned above.

I proved that the laws of science do not always hold true.

First Place Agricultural Sciences Ian Waugh - Riverdale

The title of my project is "Algae: The Food of Tomorrow."

My problem was to show that algae could be used for food as a fertilizer to grow other foods. Four experiments were set up to do this. First, algae was grown with fish in a fishbowl. Second, I grew algae with carbonic acid (club soda), and 5-10-5 fertilizer. Third, I used algae as a fertilizer to grow rice seeds. Fourth, I substituted algae in cokes instead of water.

By all of the above, I proved successfully that algae could be used for fertilizer, as well as foods, without any noticeable change in taste.

First Place

Architecture and Planning Janet Alcorn - College Park Estates

My project was titled, "Greater Use of Urban Areas." My problem was to create a house which would house more families more comfortably, in less space. Fulfilling these needs, I created the Spool House. There are 24 spool houses in an apartment building. Each spool house is equipped with an open patio and has access to the ground level recreation area. These are underground parking and elevator service for the entire building. From the street my house takes the form of a pole with four cir-

cular discs extending from it. It looks very much like the towers of the New York Exhibit of the N. Y. World's Fair which is where I got the idea for my project. In just a few years, I believe this house of the future will be the common house of the day.

First Place - Chemistry

Bob Patterson - Berwyn Heights
My project, which I called "Firefly Chemistry," dealt with developing a source of "cold" light through the use of chemicals.

To develop this source of "cold" light, I combined a diluted solution of potassium ferricyanide and hydrogen peroxide and I mixed this solution with a protein derivative. The mixture gave off a bluish green light which lasted four hours.

My reason for choosing this topic was because of my intense interest in man's advancement in the realm of space exploration. I feel that in the future it will be necessary to produce a source of light that will not radiate heat.

First Place

Earth & Astronomical Sciences Martha Risinger - College Park Estates

The purpose of my project, which was called "What is the Hydrologic Cycle," was to explain the hydrologic or water cycle, so that it could be easily understood. I illustrated the hydrologic cycle by using a terrarium, which served as a working model. The water cycle, which is the movement of water into the air and back to earth again, is very important to man, for this cycle is the cause of rain and other precipitation. I chose this topic because we discussed it in science and I became interested in continuing study. Since the cycle is so important, I felt that it was a worthwhile project.

First Place - Engineering Charles Littleton - Berwyn

With my project, "The How and Why of Wings," I am trying to compare the lift capabilities of the six basic designs of wings. I am explaining how a wing is designed and why it rises.

The reason I chose a project in aerodynamics is double-fold. First, because I am interested in flying and therefore in wings, and secondly, because I design and build my own gas models and wanted to test some of my own designs.

I was not trying to prove anything with my project; merely to illustrate how to design a wing and tell how it rises. I was also comparing the six basic designs of wings by placing them in a wind and testing lift.

First Place - Mathematics Roger Lewis - College Park

My project, "Number Base Converting Machine" deals with the new mathematics. It explains the conversion and reading of the bases. My math has interested me and

MEDICARE REGISTRATION

All those 65 years of age or over should register for medicare with their Social Security Office by March 31st.

for this reason I chose to do my project on number bases and how to prove them.

First Place - Physics

Julie Brooks - Berwyn Heights
In my experiment on "Electromagnetism," I constructed my own battery, using copper plates, iron plates, blotting paper and acid. I developed a magnet with a small nail and some fine wire.

As the current from the battery flowed through the wire and around the nail it developed a magnetic field! The flow of this electric current was controlled with a circuit breaker.

This year I became interested in the construction of the battery and the magnet; therefore, I chose to illustrate the principle of the battery as my project.

Second and third place winners are as follows: Agricultural Sciences, D. Hutchinson and Cheryl Champion; Architecture and Planning, Thomas Watts and J. Beardley; Botany, Tom Blacker and Marion Cooke; Chemistry, Harvey Wilson and Pat Huber; Earth and Astronomical Sciences, Paul Stombaugh and Ronald Sillaman; Electronics; Richard Jelinek and Kurt Hessinger; Engineering, Danny Moore (2nd); Medical Sciences, Scott Plummer and Gary Grant; Physics, Paul Davis and James Powers; Zoology, Steve Opasmick and Susan Gregerson.

Special awards for Best Presentation were given to Gary Grant, Mary Lynn Chandler, Wayne Shotwell, Paul Davis, Ann Sorenson, Carolyn Winkler, Pat Agee, Dennis Larsen, Danny Moore, Dale Hower, Celia Eisner, and Bonita Rybon.

LITTLE LEAGUERS

by Jerry Shafer

Little League registrations for boys 8 to 12 years of age continues at the Youth Center. All boys who have not previously filled out a contract must do so by Saturday, March 5. If you cannot register on March 5, between 10 a.m. and 1 p.m. contact Jim Wells at 474-8376 or Dale Parrish at 474-7899.

The Little League Spring Dance is scheduled for Saturday, March 19 at the American Legion Hall. Contact any manager for tickets.

There are still some openings for managers and coaches in the Farm system.

FASHION SHOW MARCH 16

The Greenbelt Lady Lions will hold their annual fashion show on Wednesday, March 16 in the Municipal Building at 8 p.m. Fashions are from Philipsborn. There will also be door prizes and refreshments. Tickets can be purchased from the wife of any Greenbelt Lions Club member. For additional information call 474-6012.

ROOM 1003

MAIN NAVY BUILDING

9:00 A.M. to 3:30 P.M.

STARTING SALARIES \$3,814 to \$5,181

DEPENDING ON EDUCATION AND EXPERIENCE

These are career Civil Service positions with regular salary increases, generous annual and sick leave, liberal benefits, and will be filled on an Equal Opportunity basis. Minimum requirements: Typing, 40 wpm; shorthand, 80 wpm. High school graduates preferred.

Some part time positions are open to those with Navy Department of Defense experience.

Do not telephone — come directly to Room 1003, Main Navy Building, Constitution Avenue and 17th Street, N.W., 9 A.M. to 3:30 P.M., Monday through Friday.

If you've never been able to see the point in a new phone...

TOUCH-TONE®

CALLING

Quick—quick—quick! Telephone dialing is that fast on a new Touch-Tone push-button phone. Just a tap of a fingertip and each number registers instantly to speed your connection.

Touch-Tone phones are so easy to use—and so easy on the eyes.

Easy on the pocketbook, too. You can trade your main phone and each of its extensions for new Touch-Tone models for a single installation fee of \$5. This charge includes changing to color sets, too. The low monthly billing for Touch-Tone service is only a little more than regular individual line service. Princess® telephones, extensions, and other supplemental equipment cost the same with Touch-Tone as with standard dial service.

Visit your Telephone Business Office and see the new Touch-Tone phones. They're on display—wall, desk and Princess styles. Try them. See how easy it is to make calls the Touch-Tone way.

MUST SIGN even if only one had income.

How to make your tax refund grow

Get your tax refund in cash, and chances are the money fritters away.

Get your tax refund in the form of a U. S. Savings Bond and it will grow 33 1/3% larger at maturity. Tucked away to be part of a down payment on a home someday, a stepping stone to somebody's education, or maybe just a big help when some emergency pops up.

You'll find an opportunity to take your refund in Savings Bonds when you come to that line at the bottom of your '65 tax return.

Besides hanging on to your refund, you'll have the

satisfaction of seeing it grow and grow. You'll also have the satisfaction of helping your country.

Think it over when you ask for your refund this year.

FOR YOUR INFORMATION. Series E Bonds pay back \$4 for every \$3 at maturity, can be cashed in when you need them, provide certain tax savings, can be bought where you bank or work. Ask about Series H Bonds for income by check every 6 months.

Elisabeth Wilhide of 40-C Crescent Road receiving from president Harvey Geller a refund of the one millionth dollar deposited in Twin Pines Savings and Loan Association.

Twin Pines Hits Million

The total amount of money Twin Pines members have saved in their savings and loan association reached the \$1,000,000.00 mark on Feb. 19. Elisabeth M. Wilhide of 40-C Crescent Rd. deposited the millionth dollar, and it was returned to her in a ceremony at the Twin Pines Annual Meeting held Feb. 22 at the Greenbelt Youth Center. Harvey Geller, president of the association, reported that members had increased their savings more than \$172,000 during 1965, and had increased their loans over \$220,000. At the end of the year assets totaled \$1,057,726, he said.

The members elected Robert A. Hill, Charles T. McDonald, W. Victor Smith and Charles B. Parker to the Board of Directors; George Reeves, Jeremy Anderson and John W. Maffay to the Supervisory Committee, and Leonie Penney, Eleanor Ritchie, Arlene Calof and David Kelley to the Nominating Committee.

Dr. Thomas C. Kelly of 110 Lakeside Dr., Administrative Assistant to the Prince George's County Commissioners, was the featured speaker at the meeting. He pointed out how employment on the basis of merit, and effective training of employees, has tremendously

McGuire-Ray

Mrs. Mary L. McGuire of Greenbelt announces the engagement of her daughter, Mary Lou, to Larry A. Ray, son of Mr. & Mrs. Samuel Ray of Laurel. Miss McGuire, who is also the daughter of the late Mr. James A. McGuire, graduated from Pallotti High School and is now with the National Aeronautics and Space Administration. Her fiancé, a graduate of De Matha High School, is with the National Security Agency. No date has been set for the wedding.

increased the morale and effectiveness of the entire county administration.

BIDS WANTED

Recreation Review

by Richard Stevenson
Director of Recreation

Roller Skating

The newly purchased boot skates have been an added feature at the Skating Program. First and second graders skate on Mondays; third and fourth graders on Wednesdays and fifth and sixth graders on Friday. Have fun, try skating.

Basketball Tournament

The Fourth Annual Greenbelt Basketball Tournament will be held at the Greenbelt Center Elementary School Gym, March 28 to April 2. League winners from Recreation Department Leagues in the Washington area have been invited. This

tournament will present some of the finest basketball in the area. Plan ahead for this tournament.

Men's "B" League

The powerful Knicks continued on with an 80-61 win over the Celtics. Bob Pahel led the winners with 37 points and Rase scored 24 points for the losers. The Lakers

stayed in the race with an 84-74 victory over the Bullets. Moffat's 24 points paced the winners. Kelly's 41 points for the losers set a league high for one game.

HOMEWORK PROBLEMS?

Students are reminded of the Study Hall program which offers help with homework every Tuesday and Thursday nights from 7-9 p.m. at the Methodist Church, Ridge Rd. You do not have to be a member of the church in order to benefit from this program.
